

IN THE SPECIFICATION

Please cancel the entire specification of the subject U.S. patent application, as filed, as constituted by the verified translation of PCT/EP 2005/051155, including the List of Reference Characters, in favor of the concurrently submitted Substitute Specification. That substitute specification is the result of the entry into the verified translation of a cross-reference to related applications, of a discussion of a prior art document, as was done in the PCT application, and of suitable section headings; the deletion of the List of Reference Characters and of references to the claims; the correction of minor errors in phrasing, grammar and punctuation, and a general revision of the verified translation to place the substitute specification more in a form in accordance with U.S. practice. These various changes and corrections do not constitute any new matter. A marked-up copy, showing the changes made to the verified translation, to arrive at the substitute specification, is provided for the Examiner's review.
